

# Spring / Summer 2020

RUG SOLID

**The most incredible rugs you've  
ever seen, designed in Denmark  
and made exclusively from  
sustainable materials.**

**That is what we do.**

L

**DOBRY DESIGN  
WINNER 2020**

**Our production is certified.**  
Beyond ensuring a production using recycled material, the Global Recycled Standard also ensures high quality working conditions.

- No child labour
- No slavery
- Wages & benefits
- Certification of recycled material
- Working hours & overtime regulation
- Health & safety
- No use of harmful chemicals

**We believe every step counts. That is why  
this catalog is 100% biodegradable,  
CO<sub>2</sub> neutral and fully recyclable.**

Tuscany Collection.....	57-60

# Cotton

It will never go out of style.

**How it's made.** To make the Cotton Rug we use off-cuts from the fashion industry. These off-cuts are created as waste, when t-shirts or other fashion products made from cotton is produced. Our artisans cut these off-cuts into strings and weave them together by hand, making every Cotton Rug unique.

# Leather

A Scandinavian favorite.

**How it's made.** When a bag is produced the leather is cut from a fresh hide. The leftovers from the hide is called 'off-cuts' and is discarded as waste. We upcycle and use these off-cuts. Our artisans cut the leather into strings and weave them together by hand, making every Leather Rug unique.

# Jute / Leather

Add a golden twist to your nordic home.

**How it's made.** The leather we use in the Jute / Leather Rug is upcycled leather off-cuts from the fashion industry. Our artisans cut this leather into strings and weave these strings together with natural jute. Jute is an organic plant that grows quickly, making it the perfect sustainable choice.

140 x 200	2.199	3.099	3.549	300

# PET

**Made from plastic, feels like wool  
and you can use it outdoors too.**

**How it's made.** The PET Rug is made from recycled PET plastic, and a single squaremeter contains up to 75 plastic bottles. The plastic is sourced by collectors on the streets in India. The collectors sell this plastic to a factory where it is processed. After processing, the plastic is recycled into small granules. As the final step these plastic granules are processed into a fresh PET yarn.

# Anti-Slip Mat

Add an extra layer of security  
under your rug.

**How it's made.** The Anti-Slip Mat is made from a jute thread covered in natural latex. Jute is a very sustainable plant growing rapidly. Natural latex is the resin harvested from rubber trees and is free of chemicals, making the Anti-Slip Mat purely natural.

# illusion

You'll feel like stepping on clouds.

**How it's made.** The illusion Rug is handmade from bamboo silk, a yarn spun from the sustainable and organic bamboo plant. It is thick, soft and has a velvet texture. It simply feels identical to silk (hence the name). The backside is made of recycled cotton and is attached with natural latex sourced from rubber trees.
